- Heavy Duty Magnesium Anode rod (Polymer tank) with function
- Blue Diamond coated tank (Polymer tank) Safety Multifunctional Valve (Polymer)
- Vibrant colours to brighten up the space

Wattage: 2000w

LIV ROUND METAL

- A classy cylindrical design which blends in beautifully to enhance the space
- Ideal for heavy usage as it offers varied storage capacity to handle the requirement
- Available in both vertical and horizontal design to compliment the space available

Wattage: 2000w

COMFORT OF USE
High pressure withstanding capacity of upto 8 bar, suitable for high rise buildings

SAFETY FEATURE
Dry Heating Protection ; Single weld line on the inner tank to reduce water leakage risk

LONGER LIFE (HEATING ELEMENT)
Fibre body (external) and heavy duty magnesium anode rod to prevent rust and corrosion. Glassline enamel coating increases durability.

1 CAPACITY:

Larger the family size, higher the capacity suggested.
There is no need to heat water again and again.

2 SHAPE & SIZE:

False ceiling – Horizontal design
External installation – Vertical design, within which compact cube design & soft rectangular design saves the space.

3 WATTAGE:

Go for wattage. Higher the better. This helps in faster heating.

4 NOVELTIES:

Timer mode, Digital display and Remote control helps in taking complete control of the device.

WATER HEATER SERIES
